

WIND POWER

WINDEMULLER PROVIDING SOLUTIONS TO WIND PROJECTS SINCE 2001

Windemuller's expert design and construction professionals are able to help take your project from concept, through construction and into operation.

Concept:

Our trusted ability to study, negotiate and determine the optimal availability of transmission infrastructure is key for site selection and layout.

Construction:

We have the unique in-house capability to design and install the complete electrical, communication, control and collection systems. Utility Interconnection, Transmission Lines, Substations, Tower Wiring and Fiber Optic SCADA Systems.

Operation:

Our reliable operation and maintenance technicians are trained and experienced to safely perform a full range of component repair and maintenance.

From conception to operation Windemuller will provide for your success.
