With the rapid pace of change in Information Technology, will you be ready? Can you manage the impact to your business? How can you remain competitive and profitable? Meeting or exceeding the rapidly changing expectations of your current and future customers, suppliers, and employees with real-world information technology is key to success for any organization. Let Windemuller use our expertise to help you find the right technology to make a difference in your business.

THE WINDEMULLER DIFFERENCE

Many IT companies charge monthly fees, don't allow customers insight or access into their systems and charge extra to send a technician on-site. This is where Windemuller differs.

Unlike most competitors, Windemuller does not charge monthly fees and we're as hands-on as you need. We strive to create strong relationships and are fully transparent throughout each step of the process. Whether your team is interested in handing off just a portion of the daily IT tasks and challenges, or if you would like our team to manage every aspect of your IT needs, Windemuller is the partner in your success.

TYPES OF ENGAGEMENT

We understand that a cookie-cutter plan won't work for everyone, which is why Windemuller offers various plans to suit our customers' needs. We customize our approach to ensure you are getting high-quality service for a fair price. Whether you are looking for a maintenance contract, a turnkey project plan, or time and materials work, we do it all.

Talk with our team today to develop a plan which meets your needs. Contact Homer Campbell by phone at (616) 877-8770 or by email hcampbell@windemuller.us.
