

# ELECTRIC VEHICLE (EV) CHARGING STATIONS

Windemuller has been in the renewable energy business for nearly two decades, serving customers ranging from large-scale residential projects to expansive municipal and commercial work. As the electric vehicle (EV) market continues to rise, our team is here to meet the needs of our customers and the evolving renewable energy landscape.

## Our Certified Technicians

Our staff of trained installers are certified with many makes and models of EV chargers. They understand the complicated installation and start-up process, therefore we can ensure your charging stations are installed accurately and efficiently. Windemuller's robust presence throughout the state of Michigan means our certified service technicians are readily available to meet with our customers as quickly and as frequently as needed.

## Our Process

The Windemuller team works with you every step of the way, starting with a site audit to assess your specific needs. Based on your requirements and budget, our team will provide a professional recommendation for a charger make and model. In addition to installation, our certified technicians complete the start-up process and are available for any future maintenance needs.

## Our Partners

## Common Questions

Are there financial incentives available related to EV charging stations?

*Yes. Windemuller can work with you to pursue any incentives available for your project.*

How do I know if I have the capacity to install an EV Charger?

*Prior to installation, Windemuller will provide an assessment to determine if any electrical upgrades are needed to support an EV charger.*
